Beautify your gifts

Giving beautiful and environmentally friendly gifts at the same time – from and with Sopp Industrie, of course.

Sustainability will become the new normal and is currently the topic. This means a great challenge for our society, as we also have to adapt and change in everyday life. At Sopp Industrie we have already started to rethink and have been using alternative materials for some time in order to inspire you, dear customers, with new, environmentally friendly ideas. Our aim remains to create particularly beautiful, decorative products while at the same time taking our environment into account.

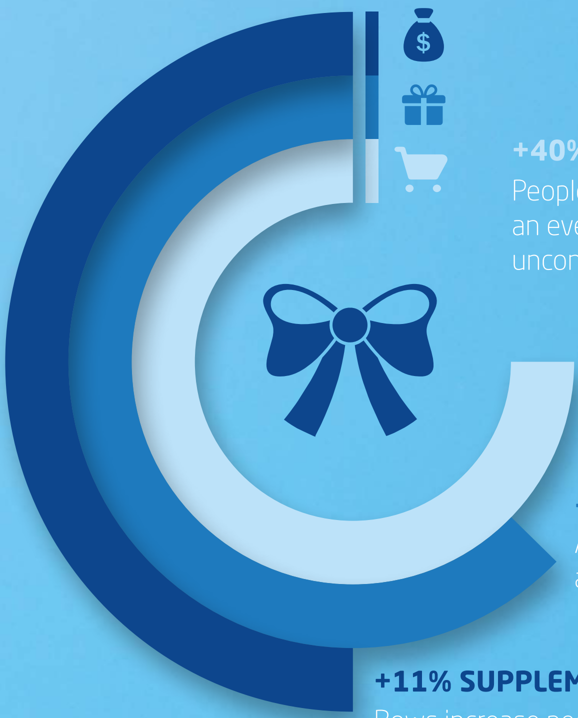
The added value of our ribbons, cords and bows in general, especially in connection with high-quality brands and products, remains undisputed and increases when biodegradable or 100% recycled materials are used. We are thus making a first contribution to becoming more "sustainable". Take part!

We hope you enjoy getting to know our new products.
Find out more and challenge us.
As always, our proven team is at your side with help and advice.

Yours
Michael Gerke & Kevin Maar
CEOs

More Success with Bows and Ribbons

Bows – the ultimate symbol of gifting.
Ribbons have the „stopping power" to set products on the shelf apart from others.
They indicate more value compared to other products and thus influence buying behavior.



+40% MORE GIFTABLE
People are much more likely to gift an everyday product, or even an unconventional product, if it has a bow.

+27% ATTRACTIVENESS
A product with a bow is found appealing by the vast majority.

+11% SUPPLEMENT
Bows increase people's willingness to pay more. People are happy to pay a price premium for a product with a ribbon bow.

Source: Scientific study of the Harz University (University of Applied Sciences for Business Psychology) under the direction of Prof. Georg Felser with support from the Multisense Institute Germany

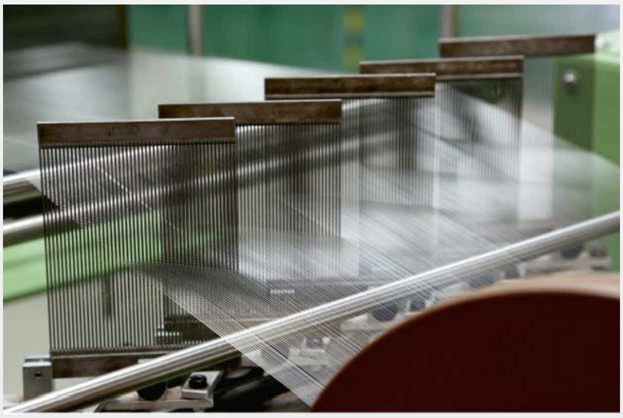
DEVELOPMENT AND CONSULTING

We set the highest standards of quality not only with our bows and ribbons, but also with our service. There are several stages between your idea and the finished product, which we will briefly explain here.

1. From the idea to the design

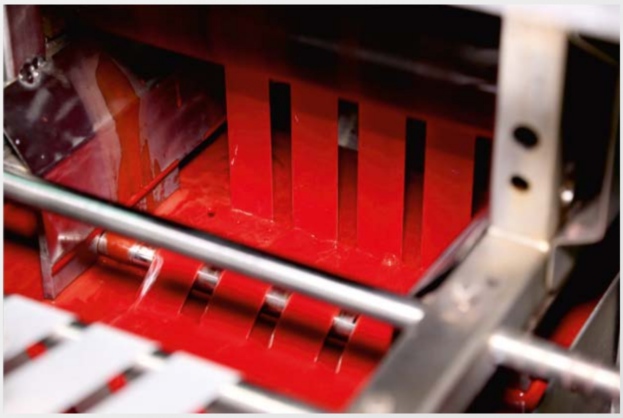
Every project starts with comprehensive and competent advice. We discuss how we can best present your products and which materials and printing processes are most suitable.

Your wishes and ideas already start to take shape.



2. At the loom

Our products can also be woven to your specifications. Special widths and designs are possible for orders that meet minimum quantity requirements. Soft satin, grippy taffeta or shimmering organza form the basis of your beautiful ribbon.



3. Now things get colourful!

Now the material is dyed. Our colour palette leaves nothing to be desired and, in addition to bright and cheerful colours, also allows for refined natural tones, current trending colours and, of course, classic black and white.

4. Custom prints

Whether you want to place your company logo, specific images and symbols or an effective advertising message on your ribbon: Our high-precision printing processes implement your ideas. With classic flat printing, tactile relief printing and luxuriously glossy accents, your ribbon becomes unmistakable.

Find more informations on page 38-41.

5. Completion

Finally, the finished ribbon is tied into beautiful bows according to your ideas or completed with special accessories. The result is a special decorative highlight, which is delivered to you right on schedule.

Our made-to-measure bow pattern can be found on page 34-36.

Bow Collection available from Stock

This is how you pack effectively, quickly and efficiently:

Handmade bows in different sizes and colours.
Easy to apply, thanks to wired clips, adhesive stickers
or elastic straps.

Attractive selection for numerous seasonal occasions.

- Small packing units of only 250 pieces
- Minimum purchase only 1000 pieces in total
- Delivery within 3-4 working days

REBOW

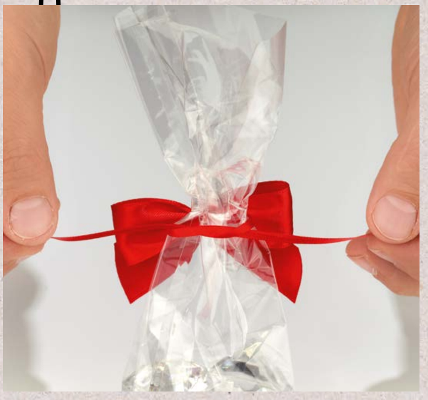
Made of PET bottles recycled bows
in shiny satin look.
Ribbon belt fastener: 2x 15 cm length.

PU 250 pieces

2 Sizes

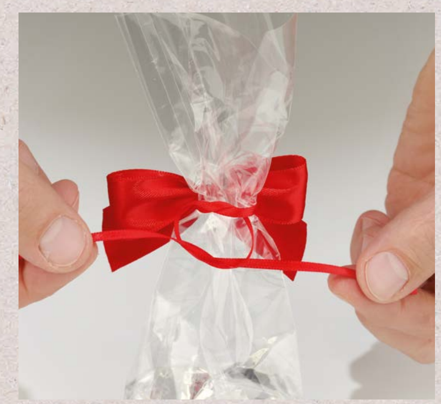
Quick. Beautiful. Sustainable.

With the practical belt fastener for tying it yourself!
Perfect for almost any type of packaging.



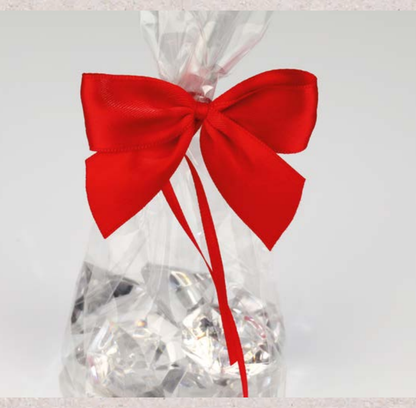
1

Place the bow on or around the package and lay the ends of the ribbon on top of each other to form a knot.



2

Tightly fasten the ends of the tape. If desired, attach a tag with a knot.



3

The ends can be cut off or used as an optical element. It´s done.

without ends

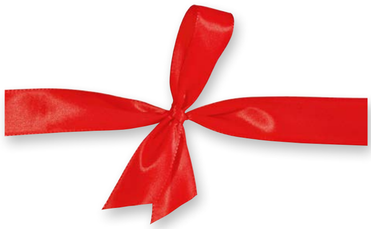
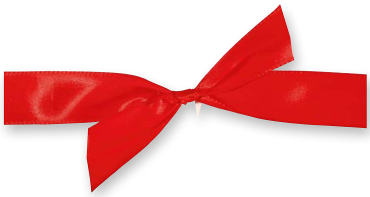
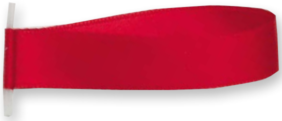
F **flat bow**
with 2 or 4 loops
and textile strap







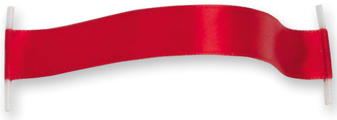
G **1-loop bow**
with textile strap

H **Pretied ribbon**
with textile strap

I **Textile hanger loop**
with 1 stopper

For more detailed information concerning made-to-measure-bows, please request the special brochure "Prettier with a bow"

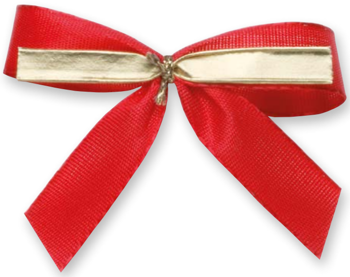
Write us a mail on **info@sopp.de**
or give us a call +49 (0) 2191 - 567 - 0



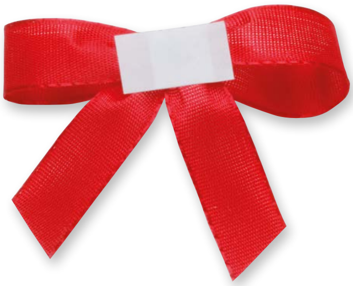
J **Textile hanger loop**
with 2 stoppers

Attachment

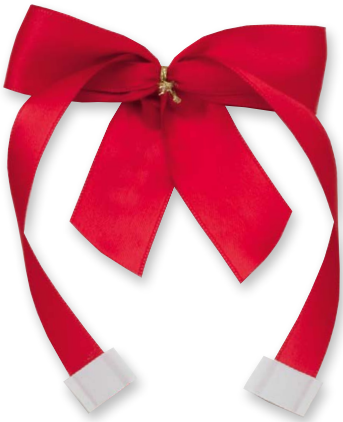
In order to enable your bow to be attached in the best possible way, depending on its use, with a minimum of effort.
We offer various fastening options from which you can choose.



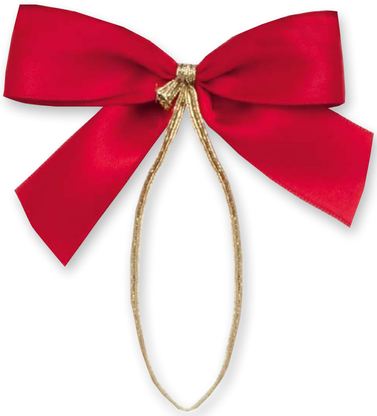
1 **with wired twist tie**



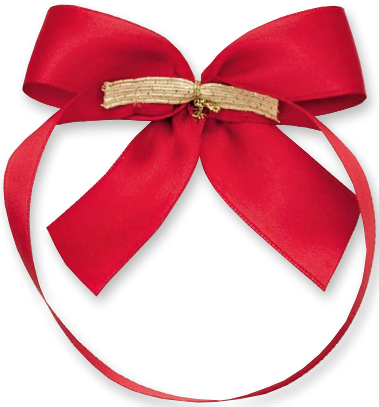
2 **with sticker**



3 **with textile strap and sticker**



4 **with elastic strap**



5 **with textile strap and elastic element**

Integrated label tags

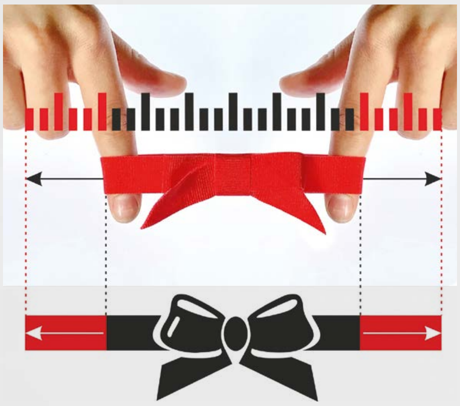
We will gladly tie your own label tags into the bow.

The tags can be used in almost any format.
As long as they are perforated (punched).

Expandable Bows

These Expandable bows adapt to many different packaging sizes.

- One bow size suitable **for many packaging formats**
- **2 widths** 12 and 18 mm
- **Strap length** according to your specifications
- **Elastic ribbon**
- **Expandable** up to **70%**



Colours are possible in Pantone
according to your specification.

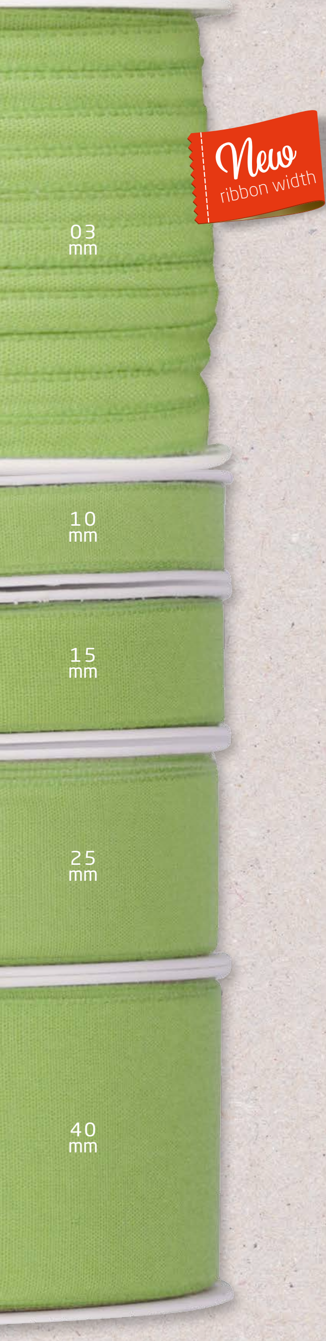
Substainable logo print on Tencel

Set an example and show your customers your personal and entrepreNewrial approach to sustainability and ecology.

Your logo, refined to a high standard on a Tencel ribbon, will plant your message with both optical as well as haptic perfection into the mindset of your customers.

Tencel™

Feels so right



Botanical origin

TENCEL™ fibers come from sustainable wood sources – natural forests and sustainably cultivated plantations. The wood and pulp is harvested from certified and controlled sources.

Biodegradable yarn

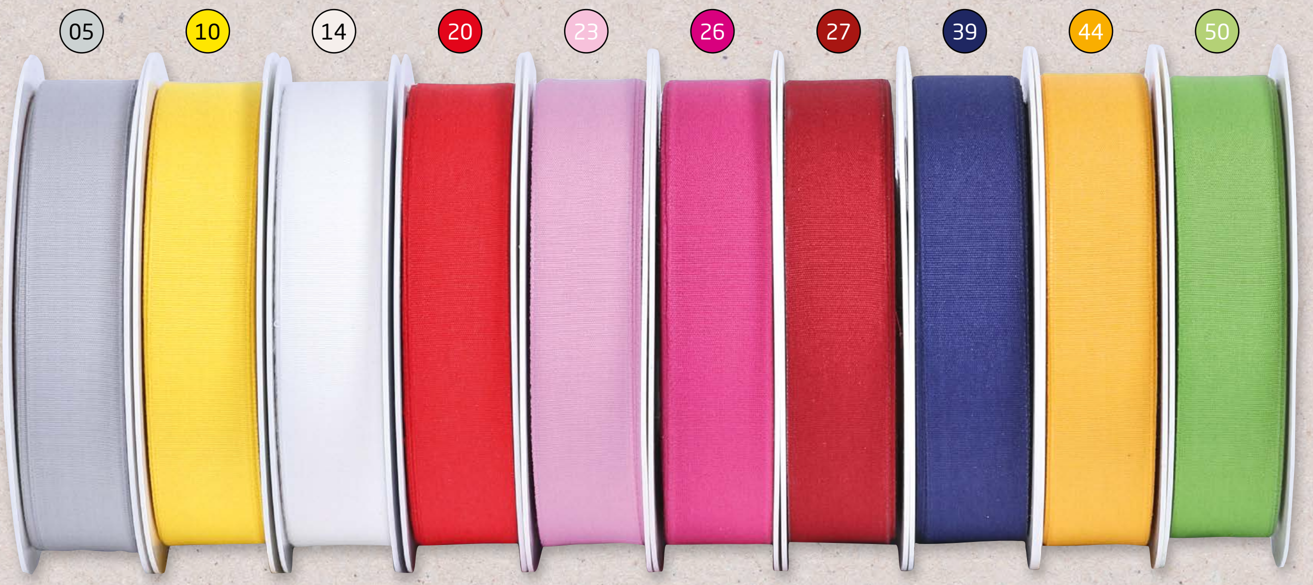
The Organic Waste Research Laboratory Systems and the TÜV confirm the biodegradability of Tencel™. The yarns are completely degradable in the soil, compost and also in fresh and sea water.

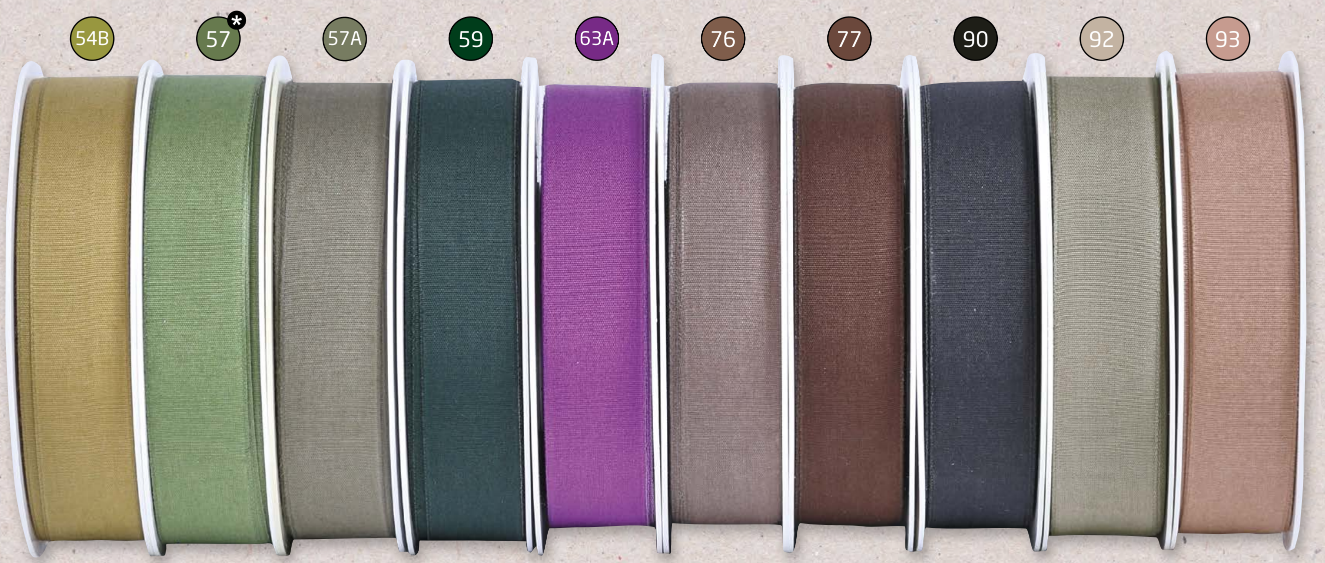
Sustainable production

TENCEL™ fibers are made in an environmentally friendly closed-loop production process that converts wood pulp into cellulose fibers with high resource efficiency and a low environmental impact.

Color brilliance

The smooth surface of the TENCEL™ fibers allows dyes to penetrate deep into the fiber structure, which results in impressive colour brilliance.





TENCEL

Woven ribbon in linen-style.
